Professional Summary

Results-driven Data Analyst with 2+ years of professional experience and an MSc in Data Science. Proven ability to translate complex datasets into actionable business strategies using SQL, Python, and Power BI. Adept at automating reporting pipelines, building interactive stakeholder dashboards, and driving data-informed decision-making.

Technical Skills

- **Core Analytics:** Exploratory Data Analysis (EDA), Statistical Analysis, Data Wrangling, Predictive Analytics
- **Tools & BI:** Power BI, Tableau, SQL, Excel, Git, Jupyter, VS Code
- **Programming:** Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), R, HTML/CSS
- **Cloud & Deployment:** AWS (EC2, S3, Sagemaker), Flask, Render

Professional Experience

Data Analyst – Product Analytics

Rooted Platform

04/2026 – Present
Self Employed

- Developed an MVP website to enable discovery of culturally authentic food products using location-based filtering and user preferences
- Designed core features including product search, authenticity-based ratings, and location-based store recommendations
- Analysing simulated user behaviour data (search queries, pricing, and location filters) to identify patterns influencing user decisions
- Performing exploratory data analysis using **Python and SQL** to evaluate cuisine popularity, price sensitivity, and store proximity trends
- Developing data-driven improvements such as personalised search and enhanced product recommendations

Data Analyst

Newcastle University, UK

01/2026 – Present
Studentship

- Conducted advanced data analysis using SQL and Python to identify usage patterns across smartcard and occupancy datasets, directly supporting strategic resource allocation decisions.
- Designed and deployed interactive Power BI dashboards, translating complex backend datasets into clear, operational insights for non-technical stakeholders.
- Collaborated cross-functionally with library management teams to establish structured data governance practices, improving overall data accessibility.

Associate Data Scientist

BEPEC Solutions

05/2023 – 05/2025
Bangalore, India

- Automated manual reporting pipelines and built dynamic business intelligence dashboards, improving overall reporting efficiency by 30% and saving 10+ hours per week.
- Led end-to-end data projects, partnering directly with stakeholders to align analytics deliverables with core business requirements.
- Developed scalable predictive models and automated workflows using Python and AWS, significantly enhancing data processing efficiency and decision reliability.

Data Analytics Intern

BEPEC Solutions

01/2023 – 05/2023
Bangalore, India

- Performed exploratory data analysis (EDA) to uncover market trends, directly supporting data-driven business decisions.
- Created compelling visual reports and dashboards to present complex findings to senior management.
- Assisted in the validation of predictive models, contributing to a 15% improvement in forecasting accuracy.

Key Projects

Commercial Opportunities Analytics Dashboard (Retail) | **Power BI, DAX, Python**

[[Projectlink](#)]

- Partnered with Sales Leadership to identify high-margin growth opportunities across 15 European markets by analyzing 4 years of transactional data (8,000+ records).
- Engineered a robust Star Schema data model using Python (Pandas) to clean raw data and prepare optimized Fact and Dimension tables for BI ingestion.
- Developed an executive Power BI dashboard with 20+ advanced DAX measures, proving that capping customer discounts at 15% and expanding the Corporate segment could recover over £150K in annual profit.

Education

Master of Science (MSc), Data Science & Artificial Intelligence

Newcastle University

Expected 09/2026
Newcastle upon Tyne, UK

- **UK Modules:** Data Visualisation, Machine Learning, Statistical Foundations of Data Science, Deep Learning, Image Processing, Data Science in the wild(Group Project), Generative Ai for Businesses, Advanced AI

Bachelor of Technology

IIIT, RGUKT

2019 – 2023
RK Valley, India (CGPA: 8.7/10)

Certifications & Achievements

UK Work Culture Programme (Awarded Participant)

Newcastle University

- Awarded a highly competitive place in an intensive 2-day professional programme focused on UK industry standards and corporate communication.
- Collaborated within a cross-functional team to solve a live business challenge set by a UK employer, presenting actionable findings and project solutions directly to stakeholders.
- Networked with international alumni and industry professionals to align technical skills with the current demands of the UK job market.
